Description

The SX8600 is a new "All-In-One" call handler, call sequencer, call manager, auto attendant with digital MP3 Player/Recorder for music on hold plus support for standard 1 to 4 line telephones, designed to provide the ultimate telecommunication solution for any size business.

SX8600 answers your incoming phone calls when your staff are busy, provides a professional greeting for a maximum 1st impression impact. It gives you the flexibility to answer the calls subsequently or let the calls go to music on hold for a later "ring-back". SX8600 ensures that all your incoming lines are answered professionally free of any stress brought on by ringing phones.

SX8600 offers a simple and easy to install solution even for the smallest business to manage all the calls as well as providing a better image.

SX8600 device delivers outstanding audio quality storing music on hold and greetings on a non-volatile removable flash card.

The SX8600 has integrated Adapter/Controller support for up to 4 lines when used with standard Non KSU type phones. It activates via Hold or Flash button on any phone and requires no attachments to the phone. The SX8600 even works on cordless phones just by pressing the Hold button and supports as many telephones as the customer may have.

All music on hold or greetings are stored on the flash card for an easy swap, or it can be updated via email through the "audio jack" connector on any PC and playing the MP3 file as well as locally by pressing the REC button. You can record your own greetings via a rich sounding microphone /headset with minimum involvement, no software drivers to install, no USB ports to find and no PC operating systems to worry about. If you are less computer savvy or have no email access, a new flash card can always be mailed.
